NUMECENT® ANNOUNCES ITS PARTNERSHIP WITH CITRIX® USER GROUP COMMUNITY (CUGC)

Citrix Ready Partner Joins Peers; Supports Global Network Of Citrix Advocates, Fanatics, and Professionals

July 24, 2018 – Irvine, Calif. – Numecent, Inc. is pleased to announce its partnership with CUGC, the official Citrix User Group Community. CUGC is an online community of technology professionals dedicated to helping members and their businesses excel through education, knowledge-sharing, networking and influence. Citrix, a leading technology solutions provider to over 400,000 organizations worldwide, features a suite of platforms and tools to improve productivity and security in the workplace. Numecent's proprietary technology, Cloudpaging™, is the well-known compliment to Citrix for its unparalleled application compatibility and portability across desktop operating systems, servers, and devices.

Cloudpaging from Numecent is often used within Citrix XenApp and XenDesktop to help migrate desktops applications onto the latest Microsoft server or desktop version, and onboard, maintain and upgrade these environments. Many of the world's largest enterprises are using Cloudpaging technology to ensure the seamless transition of critical, line-of-business applications as they migrate to and from the cloud or update their operating systems to Microsoft® Windows® 10 and Server 2016. Cloudpaging's integration and compatibility with Citrix and Microsoft, enable the technology to be readily adopted by enterprise IT departments and managed services providers (MSPs) or technology resellers focused on scalable and secure end-user management.

George Abar, Executive Director of CUGC, states, "CUGC creates an opportunity for technology professionals to share knowledge with each other and become subject matter experts in their field." CUGC invites a limited number of Citrix Ready Partners to hold sponsorship roles, although general membership is not limited.

Arthur S. Hitomi, co-founder and CEO of Numecent, commented, "I am pleased to have Numecent collaborating with such an elite group of peers supporting the Citrix Technology Professionals and working together to deliver the needs of our industry successfully." Current CUGC Sponsors include Citrix, Bitdefender, ControlUp, Dell, eG Enterprise, FSLogix, Goliath Technologies, IGEL, Ivanti, Liquidware, Nutanix, NVIDIA, PolicyPak, Tricerat, and Veridium.

For more information about becoming a member of CUGC, visit www.mycugc.org.

ABOUT CITRIX:

Citrix (NASDAQ:CTXS) aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. Citrix helps customers reimagine the future of work by providing the most comprehensive secure digital workspace that unifies the apps, data and services people need to be productive, and simplifies IT's ability to adopt and manage complex cloud environments. With 2017 annual revenue of $2.82 billion, Citrix solutions are in use by more than 400,000 organizations including 99 percent of the Fortune 100 and 98 percent of the Fortune 500.

ABOUT CUGC:

The Citrix User Group Community is a community of technology professionals. CUGC strives to be the voice of Citrix technology users and managers. CUGC is dedicated to helping our members and their businesses excel through education, knowledge sharing, networking and influence. The growing benefits include access to a global network of users, an online community, local groups, exclusive content, discounts and more. For a complete list of member benefits, see our Membership Benefits page.

ABOUT NUMECENT, INC.:

Numecent, Inc. is a fast-growing software and cloud-services company pioneering application provisioning. Numecent's Cloudpaging technology brings rapid, secure and friction-free provisioning and management of native applications from and to the cloud.
Numecent's Cloudpaging technology delivers 10+ million application sessions annually and has packaged 10,000+ applications to enterprises around the world, bringing savings to IT departments while simplifying on-boarding for new end users and reducing the IT impact for delivering new applications and updates. Other use cases of Cloudpaging include the powering of time- or feature-limited software trials and usage reports, as well as simplifying the migration of applications between servers and operating systems.

Numecent is headquartered in Irvine, California. More information can be found at www.numecent.com.
