MARTIN ZUGEC SPEAKS AT TECH USER GROUP'S LOCAL MEETING IN SAN DIEGO THIS WEEK

Citrix Senior Architect Will Discuss "Best Practices For Optimizing VDI And RDS Performance"

March 19, 2019 – Irvine, Calif. – Numecent, Inc. is pleased to announce its sponsorship of the local meeting for the San Diego chapter of the Citrix User Group Community (CUGC.) The agenda includes a presentation by expert speaker, Martin Zugec, Senior Architect, Technical Marketing at Citrix. Zugec will discuss how to approach VDI and RDS operating system optimizations to provide fast logons, superior user experience, and higher host density. There will also be opportunities to discuss different tools, utilities, best practices, and recommendations with Citrix peers.

The meeting will be held on Thursday, March 21, 2019 from 3:00 pm until 6:00 pm at At Ease @ Barrel Harbor, located at 8990 Miramar Road, #150, San Diego, CA 92126. Food and beverages will be provided, courtesy of Numecent. There is no cost to attend this special event, but space is limited and registration with the San Diego CUGC local chapter is required. More information can be found here.

ABOUT CUGC

The Citrix User Group Community is a community of technology professionals. CUGC strives to be the voice of Citrix technology users and managers. CUGC is dedicated to helping our members and their businesses excel through education, knowledge sharing, networking and influence. The growing benefits include access to a global network of users, an online community, local groups, exclusive content, discounts and more. For a complete list of member benefits, visit the Membership Benefits page.

ABOUT NUMECENT, INC.

Numecent is an award-winning pioneer and technology leader of Cloud and on-premises software solutions for modern workspaces and virtual desktops. Its core technology originated at the University of California, Irvine from a project funded by the Defense Advanced Research Projects Agency (DARPA), an agency of the United States Department of Defense.
