

NUMECENT WINS OC TECH ALLIANCE'S 23RD ANNUAL HIGH-TECH INNOVATION AWARD

Numecent's Cloudpaging Technology is Recognized for Excellence in the Cloud/SaaS/Web Platform Solutions Category

October 19, 2016 - Irvine, CA - Numecent®, a pioneer of cloud-based application delivery, today announced that it is the winner of the 23rd Annual OC Tech Alliance High-Tech Innovation Award in the category of Cloud/SaaS/Web Platform Solutions. The award was announced at the October 6th OC Tech Alliance dinner at the Westin South Coast Plaza in Costa Mesa.

"Numecent is honored to be recognized by the OC Tech Alliance for our innovative Cloudpaging products," says Tom Lagatta, Numecent's President and CEO. "Cloudpaging provides cost savings to enterprise customers who need to distribute vital applications to end users by streamlining delivery, reducing demands on IT, and helping to manage license and subscription costs."

The OC Tech Alliance Award recognized Numecent for the ingenuity of its Cloudpaging technology. Cloudpaging allows Windows Applications to be delivered through Software-as-a-Service (SaaS), which enables enterprise customers to streamline application delivery via a self-service, app store-style website. This greatly reduces the time needed for new user on-boarding and app updates, delivering applications in minutes, fully ready to run with no installation needed. Cloudpaging also allows ISVs to deliver subscription-level offerings with full license control, securely and instantly. Numecent's Cloudpaging technology saves enterprise customers time and money by easing the burden on the IT department.

The OC Tech Alliance High Tech Awards recognize Orange County-based companies that have demonstrated genuine technological innovation. The OC Technology Alliance is a nonprofit trade association committed to addressing the needs of small-to-midsize technology companies in Orange County, CA. More information about the OC Tech Alliance is available at www.octechalliance.com

About Numecent

Numecent is a fast-growing software and cloud-services company pioneering application delivery. Numecent's Cloudpaging technology brings rapid, secure and friction free provisioning of native applications from the cloud through virtualization and containerization.

Delivering solutions to Enterprise customers via channel partners while also servicing cloud providers and ISV's, Numecent, has delivered cloudified applications worldwide, reducing the pain points for application delivery while helping lower costs. Numecent was founded in 2008, and is headquartered in Irvine, California. More information can be found at www.numecent.com
