

## **NUMECENT COMING TO BRIFORUM TO EXHIBIT CLOUDPAGING TECHNOLOGY**

### **David Blezard of UNH to Discuss Experience with Numecent Cloudpaging During Session at Boston-based Conference on July 26**

July 19, 2016 - Irvine, CA -Numecent®, a pioneer of cloud-based application delivery, today announced that it will exhibit at a leading independent End User Computing conference, BriForum Boston, running from July 26-28, 2016. Numecent will be exhibiting its innovative Cloudpaging for Enterprise offering at BriForum and will have staff on hand to answer questions. Numecent's Cloudpaging offering will also be featured in a BriForum breakout session. David Blezard, Academic Computing Systems Manager at the University of New Hampshire, will discuss how Numecent's Cloudpaging technology delivers native Windows applications without installation to end users in enterprise and bring-your-own-device (BYOD) environments like UNH.

"Numecent is excited to show the audience at BriForum how our Cloudpaging solutions can provide fast, secure access to applications via the cloud," says Tom Lagatta, President and CEO, Numecent. "We are thrilled to be a part of the presentation by David Blezard of UNH, which has successfully used Numecent's Cloudpaging technology to provide its students and faculty with easy access to applications."

David Blezard will speak to how Numecent's Cloudpaging technology can be used on college campuses, and will discuss how Cloudpaging has expanded access to applications for UNH students and faculty. Cloudpaging delivers native Windows applications without installation, removing complexity from corporate Windows images or VDI templates and allowing applications to be compartmentalized and delivered as users need them. More than 100 universities have deployed Cloudpaging via Numecent partner, Software2, and have expanded access to essential applications while effectively managing IT costs.

"Numecent's Cloudpaging has revolutionized applications access for UNH, so that we are now able to provide fast, secure access to virtualized applications while easily managing IT costs," says David Blezard.

Bleazard's conference session, titled "Simplifying Application Deployments in the Enterprise with Cloudpaging," will take place on Tuesday, July 26, 2016 at 1:35 p.m. in breakout room two. See the BriForum website for more information: <http://briforum.com/2016/US/>

Numecent's Cloudpaging for Enterprise offering includes the Cloudpaging Studio, Cloudpaging Server and Enterprise Portal. This offering provides a full solution to create Windows Application Containers, deliver them to user devices or VDI sessions and execute them natively.
