

DEEPSTREAM OVERVIEW

Deepstream is a groundbreaking cloud technology that enables the delivery of both native Android applications and virtual machines from the cloud. It enables customers to rapidly Cloudify low-level application data and pages and deliver them from the Cloudpaging content delivery network (CCDN) platform almost instantly, with zero installation of the application on client devices.

PROFESSIONAL SERVICES

Migrating your application estate isn't just about packaging the applications. We believe that application packaging should tie into an organization's rollout strategy. In our experience, a good rollout strategy in combination with quality application packages results in successful and faster deployments.

As the inventors of Deepstream and our patented Cloudpaging technology, we are experts in packaging Windows applications. Whether you are worried about migrating a legacy application or complex Android applications with several integrations, our team has packaged it all. We also have a strong partner network with trusted packaging vendors that we leverage when migrating large application estates.

DEEPSTREAM PROFESSIONAL SERVICES PHASES & DELIVERABLES

Advisory Phase

Includes 20 hours of professional services for \$7,000 (USD).

Deliverables

- Assessment and categorization of your application estate (up to 250 applications)
- Prioritization and phasing by business need and technical complexity
- Recommendations for training and resources
- Packaging and rollout project plan with deliverable production phasing

Packaging Phase

Includes packaging and management services. Cost varies by effort level required to package the application.

LEVEL OF EFFORT	ESTIMATED HOURS TO COMPLETE	FIXED PRICE PER APPLICATION
LOW	LESS THAN 6 HOURS	\$350 (USD)
MEDIUM	6 TO 10 HOURS	\$600 (USD)
HIGH	MORE THAN 10 HOURS	\$1,100 (USD)

Deliverables

- Package application based on the project plan defined in the advisory phase
- Agile packaging processes with frequent application delivery
- Formal status updates to provide high visibility into progress
